Canopies • Trays • Combos • Mats • Liners • Racks

1300 656 599 • www.flexiglass.com.au
Flexiglass commenced in Western Australia in 1949 when Harry Robins saw the first Holden car and identified the need for a station wagon. Harry created his first canopy using a steam bent timber frame and sheet metal panels. It was an outstanding success and he was soon making a range of designs from aluminium sheeting with side sliding windows. This innovative canopy featured laminated glass and an interior dome light. This was just the beginning for Harry. In 1956 he designed the first ever fibreglass canopy. This canopy was years ahead of its time and featured many similarities to today’s canopies. In 1959 Harry diversified into the fibreglass boat building business and together with his two sons created the foundations of today’s Flexiglass. Together they designed and perfected a new system of fibreglass that they called “FLEXIGLASS”. Unlike the ridged canopies of the time, it was extremely lightweight and flexible.

Throughout the 1970’s Flexiglass continued to grow and branches were opened in South Australia and Victoria. Demand rapidly grew around the country and New South Wales and Queensland branches soon followed. In 1989 “Flexiglass” and “Challenge Canopies” merged to form “Flexiglass Challenge” - Australia’s largest canopy manufacturer. In 2002 Flexiglass Challenge was acquired outright by Fleetwood Corporation, an ASX 200 Listed Company. In 2018 Flexiglass Challenge was acquired outright by Aeroklas Australia, a global leader in automotive accessories. Aeroklas Australia brands include Aeroklas, TJM, Flexiglass and Bocar.

**About Flexiglass - The original canopy brand since 1949**

**National Network - Local support**

With dedicated branches nationwide, Flexiglass is able to provide support to the large number of dealers, distributors and end users across the country. With an outlet generally available within most major rural and provincial locations, and spare parts readily available, product support is never far away. All Flexiglass branches offer in-store fitting and colour coding.

1 50KG
1 00KG
The FlexiSport Premium canopy features full central locking to side windows and rear door, along with many other great features. The FlexiSport Premium canopy provides the perfect canopy integration solution for your vehicle. Featuring full remote central locking to rear door and side windows, this canopy removes the risk of forgetting to lock up before you leave your vehicle, and adds the convenience of no longer needing to carry an extra set of keys to lock and unlock your canopy. Another nifty feature is the push button opening side windows, with the button hidden behind the vehicle cab and front of the canopy, simply press this small hidden button and the side widow will open up fully under its own head of steam leaving your hands free.

Just like most of the Flexiglass range the body of this canopy is constructed using fiberglass, meaning a tough built ute canopy, with a smooth colour coded finish. The tinted safety glass provides comfort and style by reducing glare into the canopy. With the premium felt lined interior finish you could be mistaken for thinking that this canopy was part of the original vehicle build.

This canopy also includes integrated features like rear window demisters, for those cold winter mornings, rear spoiler LED brake light and interior LED light with on/off/door functions. The drop down front window makes cleaning a breeze and the push button side lift up windows provide easy access. It’s the attention to detail along with the market leading knowledge and experience that leads to a seamless transition from a canopy-less vehicle to a canopy integrated vehicle solution.

Roof bars come standard with this canopy, allowing for optional extras like a Rhino Racks bars and accessories. Also compatible with the 150kg rated FlexiRacks (most vehicles) for heavy duty applications. Pop-up pressure or rotary air vents, matching tub liners and mats also available as optional extras.

FlexiSport Premium canopy available in all your recent common dual cab models including Ford Ranger, Toyota Hilux, Holden Colorado, Mazda BT50, Mitsubishi Triton, Nissan Navara NP300, Volkswagen Amarok and Isuzu Dmax.

FlexiCombo Double tray and canopy

The FlexiCombo Double traytop canopy and tray provides the perfect combination of space, access and security. This series also boasts a large range of optional accessories for added storage, style and functionality.

Large opening side windows and rear door, all with matching drop tray sides, allow for a huge open access space. Rear window includes integrated LED brake light.

More storage space can be added with sliding under tray trundle drawers and tool storage boxes. And if that’s still not enough storage space the FlexiCombo Double is compatible with 150kg dynamic (400kg static) rated FlexiRacks which allows canopy roof top storage.

Each window and door is built with two locking handles, providing a high level of security for your cargo. But just to be sure you can add even more security with front, rear and side window security mesh.

Why not add some taillights with protectors and side step rails for an enhanced look and extra functionality. Pop-up pressure or rotary air vents, durable non-slip 4mm rubber mats and pipe clamps also available as optional extras.

The traytop canopy body is constructed with fiberglass and features a durable textured finish, while the tray is all aluminium, meaning a tough yet light weight product.

The FlexiCombo Double is available to suit most single, extra and dual cab chassis vehicles.

Accessories - FlexiCombo Double tray and canopy

- FlexiRacks with internal supports
- FlexiRacks with overcab extension
- FlexiRacks with steel basket
- Durable non-slip 4mm rubber mat
- Under tray trundle storage drawer
- Under tray tool storage boxes
- Side window security mesh
- Front or rear window security mesh
- Stop, tail, indicator, reverse, taillights
- Taillight protectors and side steps
- Rotary (white) or Pop-up (black) air vent
- Rooftop pipe clamps
The FlexiCombo series combines all the best features of the Flexiglass traytop canopy and tray to create a perfectly matched solution.

The traytop canopy body is constructed with fiberglass and features a durable textured finish, while the tray is all aluminium, meaning a tough built canopy and tray combo.

The large opening rear door provides easy access to your cargo. You also have the option of adding one or two side lift-up windows doubling your side access.

Extra storage space can be added with sliding under tray trundle drawers and tool storage boxes behind each wheel.

And if that’s still not enough storage space the FlexiCombo is compatible with FlexiRacks which allows canopy roof top storage.

The rear door and optional lift-up windows are built with two locking handles, and providing a high level of security for your cargo.

If you prefer the sliding window option, security mesh can be added internally to deter theft.

Why not add some taillights with protectors and side step rails for an enhanced look and extra functionality. Pop-up pressure or rotary air vents, durable non-slip 4mm rubber mats and pipe clamps are also available.

The FlexiCombo is available to suit most single, extra and dual cab chassis vehicles.
The FlexiTraytop canopy features a durable textured finish and an aerodynamic design to complement to vehicle.

Fiberglass construction means a tough built canopy for your tray.

The large opening rear door provides easy access to your cargo. You also have the option of adding one or two side lift-up windows doubling your side access.

The FlexiTraytop canopy is compatible with FlexiRacks which allows canopy rooftop storage rated up to 150kg.

The rear door and optional lift-up windows are built with two locking handles, and providing a high level of security for your cargo. If you prefer the sliding window option, security mesh can be added internally to deter theft.

Pop-up pressure or rotary air vents and rooftop pipe clamps are also available as optional extras.

The FlexiTraytop canopy fits best with Flexiglass FlexiTray’s however is available to suit most single, extra and dual cab chassis vehicles with an existing tray.
The FlexiglassTray series features a tough yet light-weight aluminium body and drop-sides and rear tailgate for easy tray access.

The headboard with 63mm Ø tubing, full safety mesh and load stoppers provide strength and safety. An additional 63mm Ø rear ladder rack can be added to carry extra long items such as ladders and pipes. Extra storage space can be added with sliding under tray trundle drawers and tool storage boxes behind each wheel. Why not add some taillights with protectors and side step rails for an enhanced look and extra functionality. Durable non-slip 4mm rubber mats are also available.

The FlexiglassTray is available to suit most single, extra and dual cab chassis vehicles.

**Features - FlexiglassTray**

- Tough yet light-weight aluminium construction
- Heavy duty over-centre latches
- Headboard with sturdy 63mm diameter tubing
- Standard welded alloy mesh headboard
- Lightweight high strength to weight ratio
- Self draining non skid deck
- Double ribbed drop sides and tailgate for strength
- Cross mounted interlocking floor planks
- Heavy duty hardware coating for corrosion protection
- Pressed metal galvanised mudguards
- Black powder-coated mounting bearers
- Load stoppers incorporated in headboard

**Accessories - FlexiglassTray**

- Durable non-slip 4mm rubber mat
- Under tray trundle storage drawer
- Under tray tool storage boxes
- Quick release tonneau cover
- Removable 63mm rear ladder rack
- Extended extra length tray

Combined load rating across the headboard and optional ladder rack is 150kg.
Rhino-Rack accessories
Rhino-Rack make durable and easy-to-use roof racks, luggage boxes, bike carriers, kayak carriers, load securing accessories and more.

With customised products and the latest in carrier technology, you can rely on Rhino-Rack to transform your vehicle for work, play, or anything in between.

Side windows
Safety glass side windows provide comfort and style by being tinted, reducing glare into the canopy. Available in sliding or lift-up.

- Sliding side windows
- Lift-up side windows

Pop-up pressure vent
Pop-up pressure vent allows air to flow through the canopy, assisting with dust prevention.

Rotary air vent
Rotary air vents extract air, fumes and smells from the canopy.

Security mesh
Window security mesh can be added to your canopy to deter theft and add protection to your windows.

- Side window security mesh
- Front or rear security mesh

150kg FlexiRacks with internal supports
The industry leading FlexiRack roof rack product is designed and developed by Flexiglass, making this system unique to the Flexiglass range.

Using internal bracing to support the roof racks, the FlexiRack system achieves a dynamic rating of 150kg, and a static rating of 400kg! Making it perfect for heavy duty applications.

The standard FlexiRack system comes with internal supports and two roof racks. Once this system is installed you can add an overcab extension or a steel frame basket for extra rooftop cargo storage.
Polyethylene heavy duty ute tub liner

Tub liners are protective coatings that shield the inner-side of a truck bed from damage. The Aeroklas bed liner is made of a premium grade High-Density-Polyethylene (HDPE). HDPE is a very robust and flexible material. The strength and durability of this material eliminates all risk of the bed liner chipping or cracking. The quality of Aeroklas bed liners is at the highest level of protection for your valued ute tub. Capable of withstanding excessive forces and high resistance to scratches.

- Made of premium grade High-Density-Polyethylene (HDPE); robust yet flexible, doesn’t chip or crack
- Light weight, durable, scratch-proof HDPE material
- No drilling required; patented installation system
- Very durable with UV protective agent blended in with the material
- Tailgate area is rubber sealed to reduce friction between the bed and the door,
- Rubber sealed tailgate area protects against rust
