3

• Edge of the Corner Bracket of the trundle must be aligned with the Front face of the Holder.

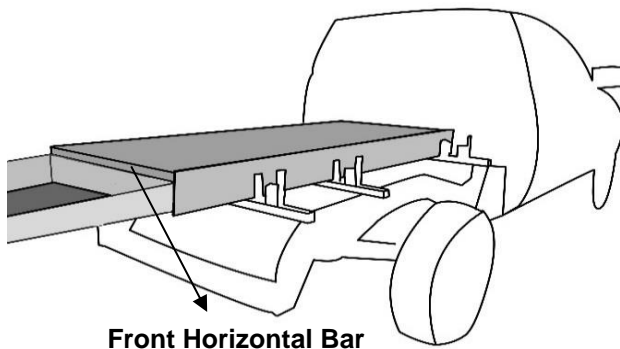

• Pull the drawer out carefully to not to damage while drilling.

• Drill **A** (Trundle Draw) through the marked hole with 5mm drill bit.

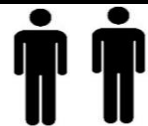

• Fit a rivet through the marked hole.

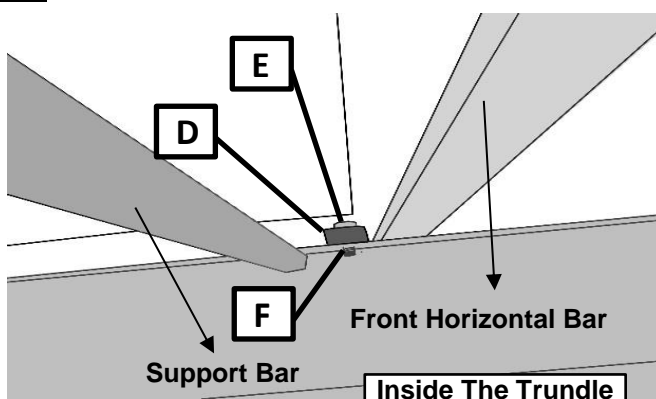

4

• Pull the drawer out about 1.2meter (until the stopper predrilled hole is visible).

5

• Fit the **D** (rubber block), **E** (bolt) and **F** (nut) to the predrilled hole which located right before the support bar. The top horizontal bar of the casing will stop the drawer coming ones the rubber block is bolted.
